

MAGNETIC THRESHOLDS

MFAT10 PH / MFAT20 PH

ZERO-THRESHOLDS
with Double Sealing

KEY ADVANTAGES:

- 20-year warranty on magnetic strips
- Delivered ready for installation
- Double magnetic sealing-ensuring high tightness (supported by certificates, facilitating the CE mark for the final product)
- High thermal parameters of thresholds, enabling use in passive houses (PH)
- Wide selection of additional elements such as: transition profile, linear drain, mat
- Applicable in new construction and renovation projects
- Recessed threshold with drainage
- Delivered with a PVC protective cover
- Option to choose renovation thresholds MFZ
- Easy threshold cleaning thanks to the ability to remove magnetic profiles

**YEARS
OF EXTENSIVE
EXPERIENCE
in threshold
technology**

TESTED QUALITIES

- Water tightness up to class E900 with a movable mullion, without additional drainage according to EN 12208
- Air permeability class 4 according to DIN EN 12207
- Sound insulation rating $R_w = 46$ dB
- Burglar resistance RC2 (including in 2-leaf constructions with a movable mullion)

Test results for thresholds are available on www.alumaster.pl

COMFORT AND SAFETY

Zero-threshold magnetic threshold systems are used in entrance and balcony doors, both hinged and tilt-and-turn, opening inward and outward.

Exceptional thermal parameters allow their use in passive construction. These features, combined with security testing, make magnetic threshold systems a perfect fit for the requirements of modern architecture.

Thanks to their main attribute - barrier-free design - magnetic thresholds are also perfect for public facilities such as hospitals, nurseries, schools, and care homes.

Exceptional Thermal Parameters

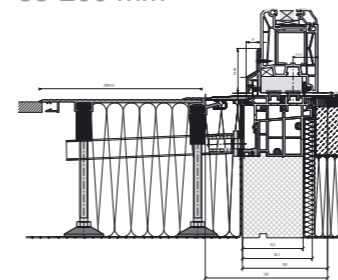

APPLICATION:

- PCV
- ALUMINIUM
- WOOD
- STEEL
- COMPOZITE

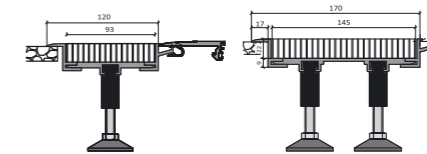

ADDITIONAL SYSTEM COMPONENTS:

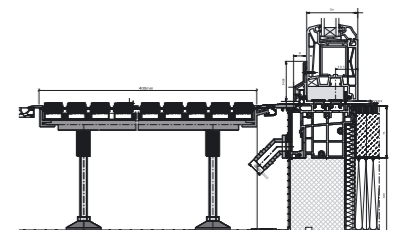

- TRANSITION PROFILE
Various applications
85-200 mm

- DRAINAGE PROFILE
Width options: 120 and 170 mm, with galvanized or stainless steel grate

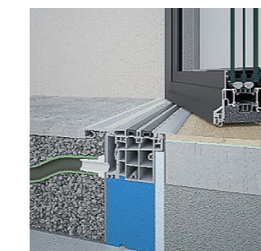

- MAT
Black rubber seal with aluminum frame

- PVC

- ALUMINIUM

- WOOD
